CLIQ® Multi-Tenant Access

In any environment with multiple tenants,
you can now put access management in the right hands

Save time and keep tenants happier

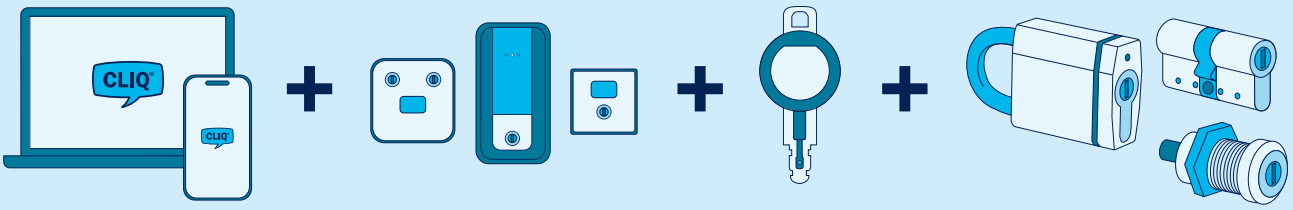
With CLIQ Multi-Tenant, you make sure control is always in the right hands.
Available for new eCLIQ digital key systems, Multi-Tenant divides access management responsibility securely between landlord and tenant – for multi-residential housing, shared office spaces, shopping malls, hospitals, and many more locations.

Landlord site security teams retain control over main entrances, common doors and technical areas

Tenants manage security for individual doors, postboxes, and other private access points

The CLIQ system at a glance

The CLIQ system is based on programmable smart keys that are compatible with a wide range of cable- and battery-free cylinders. Keyholders' access rights can be managed via a central, user-friendly software interface. Keys can be updated and activated using our convenient programming devices.



Software and apps | Programming devices and readers | Programmable keys | Cylinders and padlocks

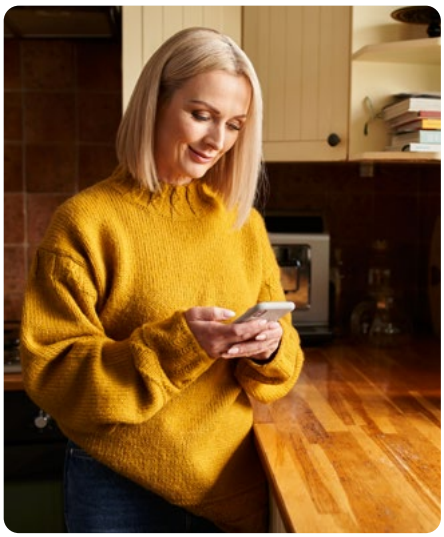
How CLIQ Multi-Tenant works

CLIQ Web Manager remains the master system for overall site security and access managment for all entrances and other common areas. Responsibility for management of the tenants' private access points is transferred securely to them directly. Landlords and site managers no longer have access.

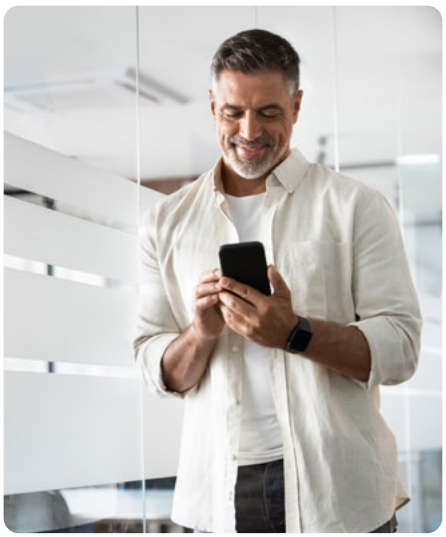
Tenants manage their own access – to a shop, apartment, or office – from the *CLIQ Mobile Manager app*. They can block lost keys, view audit trails and program schedules to suit their home or business.

Landlords focus their workload on secure access for the overall site via the *CLIQ Web Manager software*, rather than handling multiple support requests from tenants – saving significant time.

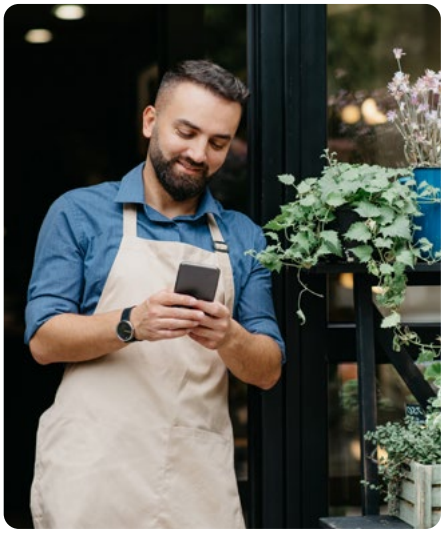
Where CLIQ Multi-Tenant makes the difference for tenants



Multi-residential properties
Block a lost key faster



Office/corporate
Manage access for different keyholders



Retail sector
Give time-based access to your staff

Hospitals
View access logs for compliance

We make your access ready for what's ahead

With us, you digitalize with confidence
