

Creating access to a fortress –  
Complete access solutions for  
banking and finance

**ASSA ABLOY**  
Opening Solutions

Experience a safer  
and more open world

# Complete access solutions for banking and finance

A place that's open to customers and easy to use, but also a high security fortress.

Our security solutions are ready as soon as someone enters the building. Automated sliding and swing doors welcome and reassure customers, while also letting staff into access-controlled areas.

Elsewhere, heavy-duty defenses are the only option. High-grade physical attack protection and locking cylinders are a must for ATMs and bank buildings.

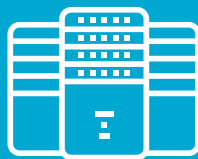

Interested in who is accessing what? You can secure entrances with real-time logging, or track movements with live audit trails.

Emergency Exits

ASSA ABLOY delivers state-of-the-art financial security, integrating cutting-edge technology with refined design. We ensure a seamless blend of style and safety, creating a secure environment for clients and employees while safeguarding your valuable assets.

## Truly innovative shapes and uncompromising safety

Ditec automatic barriers are the perfect solution for parking spaces and public areas in banks and finance facilities which need a safe, efficient and reliable access control system. They provide completely safe access to areas with medium-high transit intensity and have a wide range of add-on accessories to meet varied command and control needs.

Ditec QIK is a high performance automatic barrier, the synonym of durability: tested for over 1 million cycles, it has an opening speed of up to 2 seconds (to 90°) and blends in perfectly in any setting.

The Ditec QIK barriers, when matched to the LAN control systems, solve all access problems and are very easy to use.

It is available in 3 versions:

- one 230 V AC version of 3.5 meters
- two 24 V DC versions for through passages of up to 5.8 and 7.6 m respectively

Main entrance

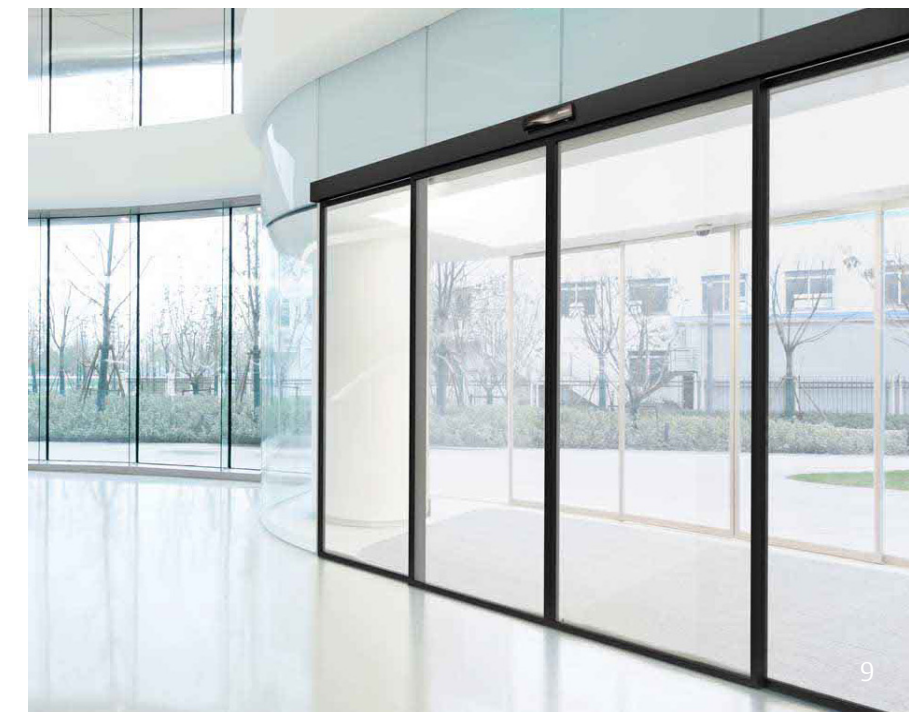

# Safety, security, and sustainability - optimizing the entrance

As entrance requires more complex door opening codes, it is not only important to meet these requirements, but to ensure only authorized personnel are granted entry, and to optimize the overall performance of access control and energy loss prevention.

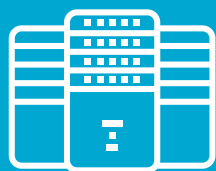

ASSA ABLOY Group brands offer a range of specialized doors and door assemblies to accessories, to ensure your achieving safety, security and environmental sustainability.

Our entrance automation solutions include:

- Ditec automatic sliding doors
- Ditec automatic swing doors
- Ditec motion and safety sensor

## Server Room

# Comprehensive security from perimeter to server cabinet

Facilities today face unique challenges to ensure the security of both physical and digital assets. Whether a data center supports a single client or provides hosted services for thousands, they are responsible for the sensitive information their customers rely on to conduct their business.

ASSA ABLOY understands these challenges and provides first-rate security products that are secure, reliable, sustainable, aesthetically appealing, and designed to meet the most stringent code and safety requirements in effect today.

Our data center solutions include:

- IKON eCLIQ
- Aperio® wireless cylinder, escutcheon and server cabinet lock

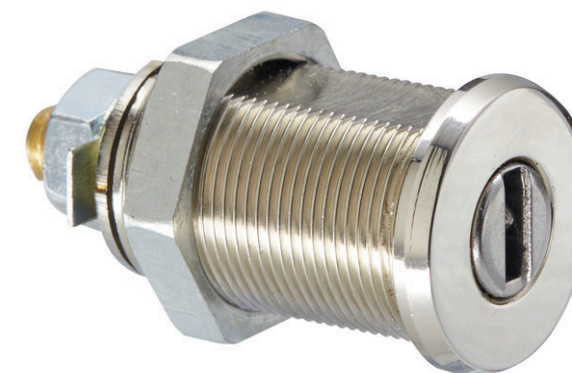

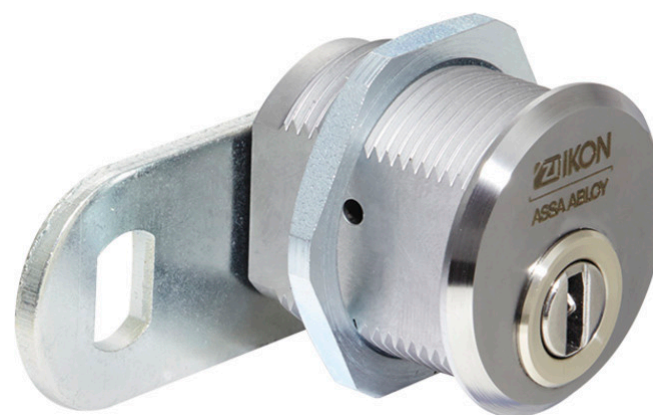

ATM Machine

## eCLIQ Cylinder

The compact eCLIQ locking cylinder offers optimal security. Thanks to the large selection of different cylinder types, the system is suitable for applications of all kinds – from entrance doors through to securing lifts, doors, cabinets and ATM machines in banks and finance facilities.

eCLIQ locking cylinder are available as double cylinders, locking lever cylinders, switch cylinders, furniture lock, padlocks and in many other designs.

## Internal Rooms

# When form meets function

Aesthetically pleasing and innovative designs can completely change the overall feeling of your building and provide a warm and safe environment. ASSA ABLOY Group brands aim to help you achieve this level of design by optimizing every doorway for positive experiences.

Entrance automation and fire-rated doors for back of house applications provide an added level of control, safety and security for your building. While door controls meet ADA code requirements protocols to provide safe and secure building access to all.

Our interior facilities solutions include

- Mechanical cylinders and mortise lock
- Master key system
- Ditec entrance automation
- Access control
- Door closer
- Traka key management system

## Handicap Toilet

# Building barrier free entrances

Barriers to access should not exclude people with disabilities from public life. Accessibility is arguably becoming one of the most important considerations in constructing new buildings and optimizing existing buildings, both from a functional and a legal perspective.

Installing accessible automated entrances is easier than ever before. They come in every shape and size, are easy to use and easy to maintain.

For example, automatic sliding doors are particularly suitable for barrier-free access for people with disabilities.

Ditec CIVIK automation is the operating device for interior sliding doors with one or two wings; versatile, silent and easy to install. It features extremely compact sizes (both width and height) and a trendy silver (EURAS C0) finish.

## Emergency Exit

# Safe and easy exit with maximum durability in high-use applications

Exit devices available from ASSA ABLOY are engineered for consistent and reliable product performance in high-use, high-abuse situations. With ease of installation — there is an exit device option for everyone, whether it's for a new construction project or ongoing renovations at your facility.

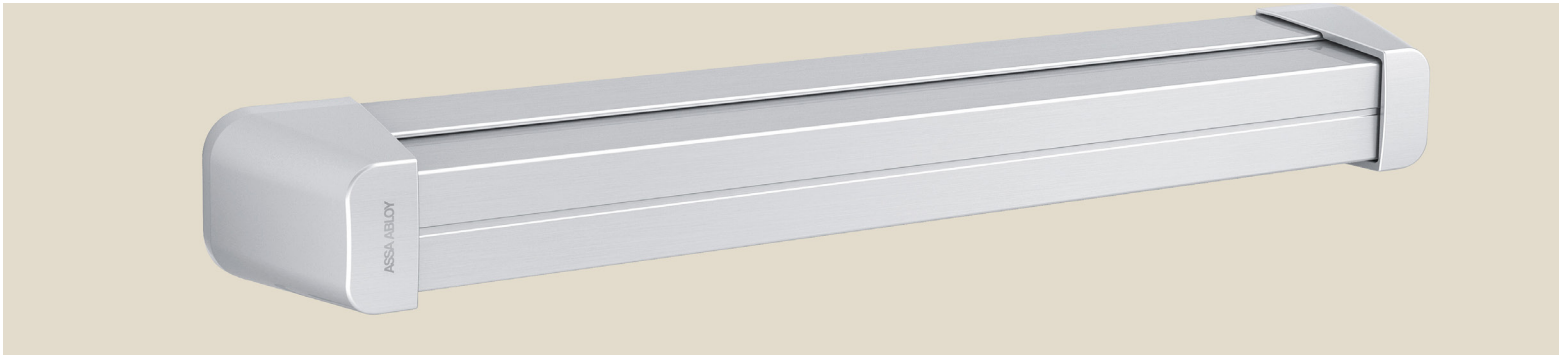

Our exit solutions include:

- Heavy duty barrier free door closer
- Integrated electromechanical overhead door closer
- ePED® panic exit device

Create Access Solutions

# Specs is our flex

ASSA ABLOY takes pride in offering a total solutions portfolio for hospitality sector that fits into any facility, anywhere. Perhaps even more valuable than the products themselves is the guidance we offer throughout the process of specifying, purchasing, manufacturing, scheduling, installing, and servicing them to meet your exact needs.

## Expert supports:

We have tools for every stage of your project, be it new construction or a retrofit application:

- Architectural and specification consulting
- Building Information Modeling (BIM) support with ASSA ABLOY Openings Studio
- Educational programs, including online, hands-on, and continuing education credit
- Site surveys and one-on-one consultations
- Expert compliance support for local, national and third-party sustainability codes and standard

# Analyze GRAPHISOFT® Archicad® 3D projects

You can extract 3D building views as well as openings information, PDF drawings, door schedules, and openings with associated parameters from Archicad using the Openings Studio add-on for Archicad 23 or 24. This is a significant step forward in the evolution of our software integrations, and we are proud to be the only solution provider that can analyze projects with 3D views in both Revit and Archicad.

After analyzing a project, you will see this purple icon in the Project Search Screen, which is used to represent Archicad projects. This will help to differentiate between analyzed Revit® and Archicad® projects.

Learn more about the analyze process for Archicad by [visiting the Openings Studio Knowledge Base](#) or download installers, go to [bit.ly/Download-OS-ARCHICAD](https://bit.ly/Download-OS-ARCHICAD).

## Corporate information

### The ASSA ABLOY GROUP

The ASSA ABLOY Group is the global leader in access solutions. The offerings cover products and services related to openings, such as locks, doors, gates and entrance automation solutions. The Group also offer mobile and biometric identity verification systems. All these solutions serve institutional and commercial customers, as well as residential market. ASSA ABLOY's innovations enable safe, secure and convenient access to physical and digital places.

### ASSA ABLOY Opening Solutions

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, business and institutions.
