Complete access solutions for government and public spaces

High security doors. Perimeter security. Solid hardware. Securing government buildings calls for high standard solutions. Our solutions are developed with ASSA ABLOY expertise to provide comprehensive security, while adhering to even the most stringent building needs and regulations.

Of course, many government spaces are also public spaces – welcoming all types of people with all kinds of access needs. We work with sturdy, barrier-free construction to make sure no-one is left out. So whether your building is open to all, or just a few, we'll make your peace of mind our highest priority.

Perimeter

Car Park

Main Entrance

Server Room

Internal Rooms

Handicap Toilet

Emergency Exits

Securing government buildings and public spaces presents a unique challenge. Rise to it with doors and access control, perimeter security solutions and sturdy mechanical and digital locks and key management system.

Perimeter

Start with perimeter security

We provide fence & security solutions to protect what matters most. From the quality of materials, American made manufacturing, and the largest support team in the industry, Ameristar is equipped to secure your property.

Ameristar engineered gate solutions are the perfect choice for high security access.

Ameristar high security fence system, from anti-ram barriers to enclosure grids, secures critical infrastructure all across the world.

Ameristar's line of fixed, retractable and removable security bollards are available in a variety of styles and crash ratings to fit your project's needs.

Truly innovative shapes and uncompromising safety

Ditec automatic barriers are the perfect solution for government buildings and public areas which need a safe, efficient and reliable access control system. They provide completely safe access to areas with medium-high transit intensity and have a wide range of add-on accessories to meet varied command and control needs.

Ditec QIK is a high performance automatic barrier, the synonym of durability: tested for over 1 million cycles, it has an opening speed of up to 2 seconds (to 90°) and blends in perfectly in any setting.

The Ditec QIK barriers, when matched to the LAN control systems, solve all access problems and are very easy to use.

It is available in 3 versions:

- one 230 V AC version of 3.5 meters
- two 24 V DC versions for through passages of up to 5.8 and 7.6 m respectively

Main entrance

Strong and smart security with flexibility

The main entrance may include a physical access component through an automated door opening such as an automatic sliding, revolving or swing door. Electronic access control systems can be added to tailor security levels to suit different times. They can also be integrated with surveillance cameras and security systems controlled from a command centre, logging the details of visitors who have entered.

Our entrance automation solutions include:

- Ditec automatic sliding doors
- Ditec automatic swing doors
- Ditec motion and safety sensor
- Security Entrance Control (SEC) access control revolving door, security portal and speedgates

Server Room

Protection of your data

Facilities today face unique challenges to ensure the security of both physical and digital assets. Physical security of hardware assets is critical for secure and dependable operations in government facilities.

ASSA ABLOY understands these challenges and provides first-rate security products that are secure, reliable, sustainable, aesthetically appealing, and designed to meet the most stringent code and safety requirements in effect today.

Our data center solutions include:

- IKON eCLIQ
- Aperio® wireless cylinder, escutcheon and server cabinet lock

Internal Rooms

When form meets function

Essential to maintaining everyday operations, administrative environments such as offices and storage facilities require access control or master key system that allows access only to the authorized personnel.

Entrance automation and fire-rated doors for back of house applications provide an added level of control, safety and security for government buildings. While door controls meet Americans with Disabilities Act code requirements protocols to provide safe and secure building access to all.

Our interior facilities solutions include

- Mechanical cylinders and mortise lock
- TESA, IKON & Medeco Master key system
- Ditec entrance automation
- Control iD, HID Access control
- Door closer
- Traka key & asset management system

Handicap Toilet

Building barrier free entrances

Barriers to access should not exclude people with disabilities from public life. Accessibility is arguably becoming one of the most important considerations in constructing new buildings and optimizing existing buildings, both from a functional and a legal perspective.

Installing accessible automated entrances is easier than ever before. They come in every shape and size, are easy to use and easy to maintain. For example, automatic sliding doors are particularly suitable for barrier-free access to handicap toilets.

Ditec CIVIK automation is the operating device for interior sliding doors with one or two wings; versatile, silent and easy to install. It features extremely compact sizes (both width and height) and a trendy silver (EURAS C0) finish.

Emergency Exit

Safe and easy exit with maximum durability in high-use applications

Emergency exit or panic exit device allow fast and efficient evacuation during emergency circumstances, is part of the building's primary security by restricting access or ensuring entry at all times.

Exit devices available from ASSA ABLOY are engineered for consistent and reliable product performance in high-use, high-abuse situations. With ease of installation — there is an exit device option for everyone, whether it's for a new construction project or ongoing renovations at your facility.

Our exit solutions include:

- Heavy duty barrier free door closer
- Integrated electromechanical overhead door closer
- ePED® panic exit device

Create Access Solutions

Specs is our flex

ASSA ABLOY takes pride in offering a total solutions portfolio for hospitality sector that fits into any facility, anywhere. Perhaps even more valuable than the products themselves is the guidance we offer throughout the process of specifying, purchasing, manufacturing, scheduling, installing, and servicing them to meet your exact needs.

Expert supports:

We have tools for every stage of your project, be it new construction or a retrofit application:

- Architectural and specification consulting
- Building Information Modeling (BIM) support with ASSA ABLOY Openings Studio
- Educational programs, including online, hands-on, and continuing education credit
- Site surveys and one-on-one consultations
- Expert compliance support for local, national and third-party sustainability codes and standard

Analyze GRAPHISOFT® Archicad® 3D projects

You can extract 3D building views as well as openings information, PDF drawings, door schedules, and openings with associated parameters from Archicad using the Openings Studio add-on for Archicad 23 or 24. This is a significant step forward in the evolution of our software integrations, and we are proud to be the only solution provider that can analyze projects with 3D views in both Revit and Archicad.

After analyzing a project, you will see this purple icon in the Project Search Screen, which is used to represent Archicad projects. This will help to differentiate between analyzed Revit® and Archicad® projects.

Learn more about the analyze process for Archicad by [visiting the Openings Studio Knowledge Base](#) or download installers, go to bit.ly/Download-OS-ARCHICAD.

Corporate information

The ASSA ABLOY GROUP

The ASSA ABLOY Group is the global leader in access solutions. The offerings cover products and services related to openings, such as locks, doors, gates and entrance automation solutions. The Group also offer mobile and biometric identity verification systems. All these solutions serve institutional and commercial customers, as well as residential market. ASSA ABLOY's innovations enable safe, secure and convenient access to physical and digital places.

ASSA ABLOY Opening Solutions

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, business and institutions.
