5.7. Security Access Card

Function: open all locks in valid time (this is the only card that can open the anti-lock).

The screenshot displays the ASSA ABLOY Lock System software interface. The title bar reads "ASSA ABLOY Lock System". The menu bar includes "File" and "Tools". The main menu bar contains "Cards", "Records", "System Settings", and "Operators". The "Cards" menu is active, showing a list of card types: "User Card", "Floor Card", "Zone Card", "Global Access Card", "Security Access Card" (highlighted), "Lock Real-time Card", "Cancel Staff Card", "One Time User Card", and "Lock Identification Card".

The "Card Type Creation" section on the left contains a description: "Opens the lock of all rooms invalid period, it can also open the room which is locked from within. (Privacy Mode)".

The "Card Parameters" section on the right includes the following fields and options:

- Card Holder: Security Test
- End Date: 6/26/2022
- End Time: 23:59
- ☐ Toggle Mode
- ☐ Passage Mode

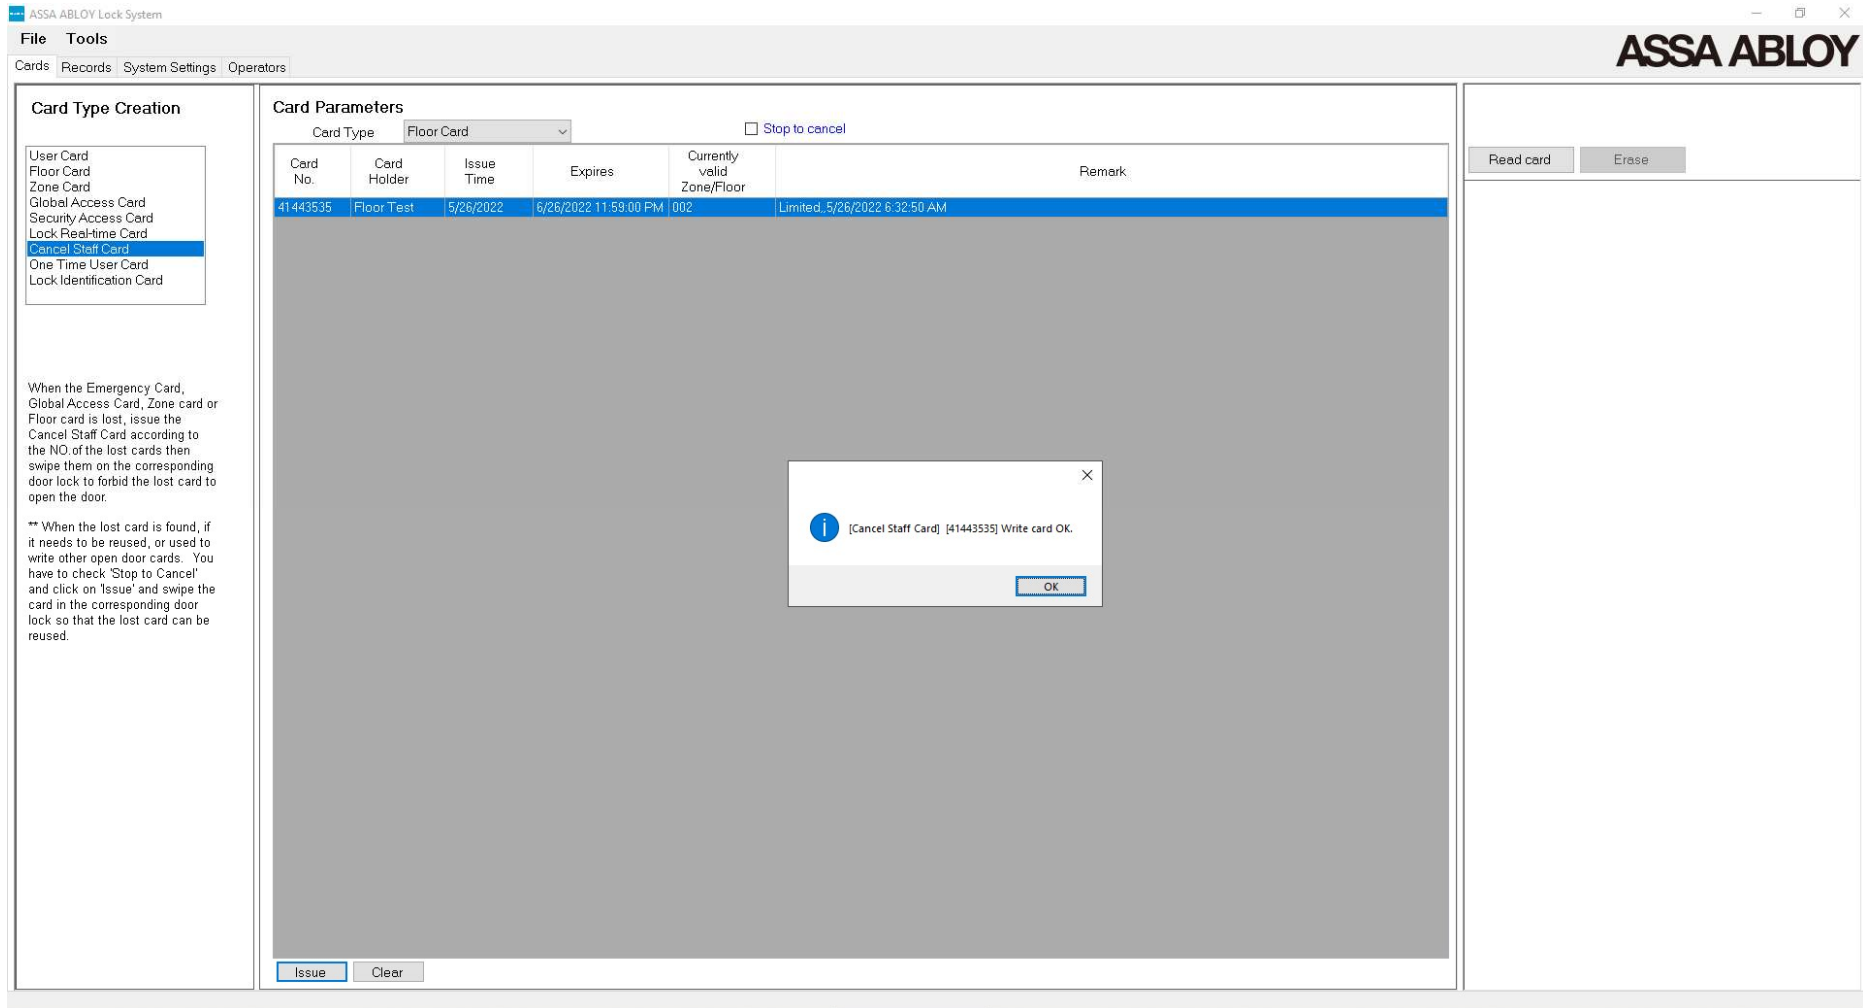

At the bottom of the "Card Parameters" section are "Issue" and "Clear" buttons.

On the right side of the interface, there are "Read card" and "Erase" buttons.

A small dialog box is displayed in the center of the screen with the message: "[Security Access Card] Write card OK." and an "OK" button.

5.8. Cancel Staff Card

Function: when a Card is lost, find out the corresponding card record, and issue 'Cancel Staff Card'. After reading this Cancel Staff Card for the lock, the lost Card will be blacklisted. As soon as the failure. This card must be used to each lock
