k-entry[®] management software

One software for all possibilities: flexible and secure

k-entry combines security and flexibility: modular and fully scalable

Even the k-entry basic package creates security and transparency within your organisation: You can manage your mechanical solutions via k-entry and you can also adjust accesses in real time in the online solution.

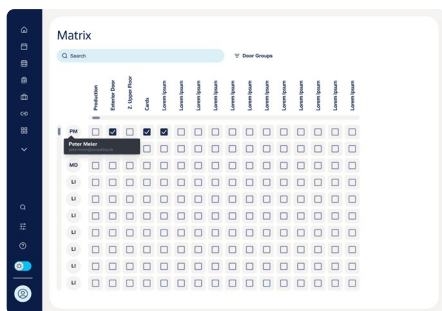

With k-entry, you can carry out authorisations in the locking plan or directly in the building plan.

The attractive design is perfected by the intuitive operation: The user-friendly interface in different languages and the strong performance of the client server architecture facilitate the use of the dedicated management software designed for KESO products and solutions.

The advantages at a glance

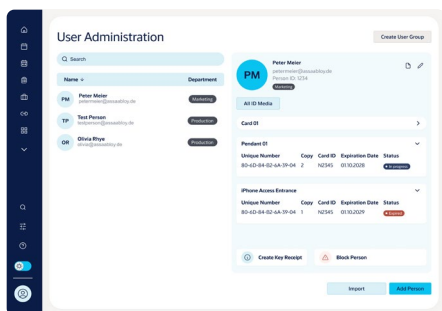

- **Tailored solutions**
Thanks to the modular structure, the k-entry software is scalable, upgrades are possible at any time.
- **Flexible system**
KESO Integra adapts itself individually to the needs of your organisation.
- **Convenient management**
Simple and intuitive allocation of access authorisations.
- **User-friendly**
Simple and clear navigation enables efficient management of the KESO Integra access solution.
- **Visitor management**
Authorisation of individual users as well as groups is possible. Start and expiry dates can be defined individually for each medium.
- **No restrictions**
Up to 10,000 users can be configured in the overall system and per door.

Maintain permanent control over your identification media by simple generation of key receipts, which can be created as a PDF for electronic signing or printed out if required. Enter all persons in your organisation into k-entry with just a few clicks - via data import in XLS and CSV format. Drag the required reports from the software and archive them in your preferred location.

k-entry is characterised by intuitive handling and enables you to easily assign authorisations via drag & drop or position the door components on the building plan

The matrix view of authorisations enables you to maintain an overview of the access management.

Set public holiday lists and access time slots for your organisation in no time and control the people flow in a targeted manner.

Benefit from the installation and function wizards that you can use to perform the desired action in just a few clicks.

- Simple viral data distribution of authorisations saves time
- Secure data transfer thanks to high encryption standard
- Security in the event of media loss by defining a validation interval

- 24/7 monitoring
- The opening of safety-relevant doors is displayed

- Targeted control of user groups per floor in lift systems
- Effective protection of sensitive security areas
- Digital linking of the relay control with letterboxes, employee lockers or medical cabinets

- Allows a system to be divided into subgroups
- The software user can only see and manage the components in their assigned subgroup

The ASSA ABLOY Group is the global leader in access solutions. Every day we help people to feel safer and more secure and to experience a more open world.
