

k-entry® upgrade: Relay Control

Subject to technical changes. PR.01_154/EC_04/2022

Greater flexibility in facility management

- Targeted and demand-oriented control of user groups per floor in elevator systems
- Digital linking of the relay control with mailboxes, staff lockers or medical cabinets
- Effective protection of sensitive security areas
- 64 freely assignable signals
- Areas of application: access to floor elevator, control of lockers/multiple containers, control of light, control of ventilation, and control of user groups via simple display
