

Mechanical solid-leaf lock
also available as a single-point
locking system

SWISS MADE

The adaptable locks
for all wooden doors: The AutoTriBloc®
and the CASA Alpha SV

Precise fitting and secure

MSL
ASSA ABLOY

Experience a safer
and more open world

The mechanical high-end lock solutions impress with outstanding adaptability

**This is how quickly
you can switch from
old to new**

With the AutoTriBloc and the CASA Alpha SV, ASSA ABLOY (Schweiz) AG is laying an impressive cornerstone for a lock range, which offers a wealth of advantages for processors and end customer alike:

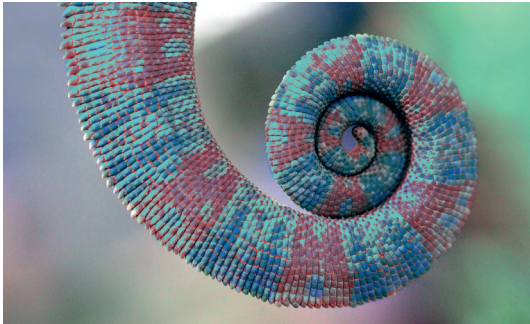

The mechanical single-point and multi-point locking systems can be installed extremely quickly in all solid-leaf doors as a self-activating lock, whether you want to make your front door, the entrance door in an apartment block or the main entrance door in a commercial building more secure.

**Just as the chameleon
always matches its
environment, the
AutoTriBloc® and the
CASA Alpha SV
fit into every solid
door**

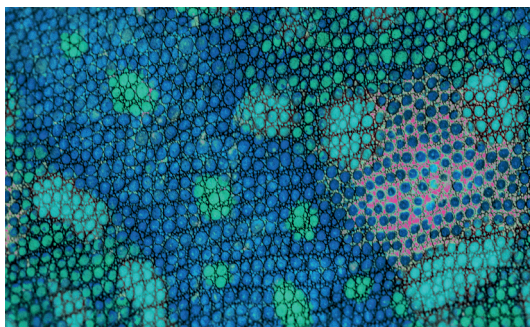

The AutoTriBloc and the CASA Alpha SV offer maximum flexibility, as the **DIN direction** and **panic side** can **be easily changed** in just a few seconds if required.

**The new compression
springs are now even
more powerful**

The new spring concept with the strong compression springs means that even extremely **heavy handles** can be installed without problems.

**Suitable for
burglary and
fire protection**

The single-point and multi-point locking systems offer **high security** and are suitable for **fire doors**.

The AutoTriBloc® and the CASA Alpha SV in combination with a striking plate

The advantages at a glance

- Mechanical high-end locks for solid-leaf doors
- For burglary and fire protection
- Panic direction and DIN direction can be switched
- New spring concept with strong compression springs
- Offset control latch, DIN universal
