CLIQ Web Manager licenses

Remote	To be able to use Remote programming devices and/or Connect keys.
Cylinder grouping	E3 keys understand cylinder and cylinder groups to which the E3 key has access. A Cylinder Group is a set of cylinders that is used to simplify the administration in large locking systems with many cylinders. For more information ask your local AA.
Web services	To set up an integration with CWM and other platforms via API. Must be ordered at the start of system!
Connect	To be able to use Connect keys in the system.
Connect+	Enables the end user to view their locking authorization and validities. Must be combined with Remote.
Extended audit trail	To keep audit trail data longer than 366 days in the software.

End user information for the licence certificate CLIQ Web Manager.

Inhouse installation.
