# CLIQ® Web Manager

Customized, cost-effective management
of your CLIQ access control system

Experience a safer
and more open world

CLIQ Web Manager, secure and intuitive software to manage day-to-day security at your business

Components of a CLIQ system

Web Manager

Software to manage access rights for multiple users, doors and time periods

Range of programming devices to remotely transfer and update access rights for keys

Programmable, battery-powered keys

Wide range of programmable cylinders and padlocks lock different access points

Main advantages of CLIQ Web Manager

CLIQ Web Manager is especially suited to organizations with multiple administrators located at different sites

- Real-time data management, while ensuring the privacy of sensitive information

- Streamlines business processes and operations with an efficient and intuitive data management interface

- Allows different options for your business' security operational needs, offering customized solutions for data management

- Integration possibilities with customer software; integrated information across separate databases

- Scalable software allowing new functions/ processes to integrate easily within the existing interface

- Improves accuracy, consistency and adds another layer of data security of all your data

"I am relaxed using the Web Manager to manage my key-based access control system"
Security Manager

Key features of CLIQ Web Manager

The CLIQ Web Manager supports efficient workflow management for both mechanical and electronic locking, enabling you to filter access to specific locks according to security needs. You can easily create customized schedules for users, doors or audit trails. It works securely to help you administer access control in the most straightforward way for your business operations, in a self-managed IT environment or with CLIQ Software as a Service.

CLIQ® Web Manager

Increased security

Software for CLIQ master-key system management

Secure login over HTTPS (certificate + programming key + PIN)

Audit trails

Access rights management

Key revalidation

Multiple software hosting and service options

Multiple administrators and sites

Scheduling

Every day a CLIQ system helps you manage access control efficiently

ASSA ABLOY access control software can do the hard work, while you benefit from upgraded IT infrastructure, high availability and total management flexibility. The CLIQ Software as a Service (SaaS) solution gives your access system the highest levels of security and scalability, saving you time, money and stress in the process.

Our SaaS solutions make budgeting more predictable and remove the need to hire additional in-house IT support and maintenance teams. You always know ahead of time how much resource to allocate and you can scale infrastructure up or down instantly.

With a CLIQ SaaS solution, you benefit from complete redundancy in data storage, so you meet compliance requirements without stress. ASSA ABLOY offers round-the-clock support, maintenance and incident reporting as standard, with Service Level Agreements delivering up to 99.5% availability. Your CLIQ software is always up to date — a major benefit for cyber-security resilience.

Your Web Manager options:

Software as a Service

Dedicated Software as a Service

In-House (on premises)

Now, with our software services, you can relax even more

Reduce costs and make annual budgeting easier

Your software is always the latest version

Employ fewer maintenance and support staff

Save time on multiple operations/processes

Spend less on system management hardware and software

Option: Software as a Service (hosted by ASSA ABLOY)

Shared Software as a Service
Hosted by ASSA ABLOY

Cost-effective and easy to budget

No need for extra server capacity, convenient and easy maintenance

Dedicated Software as a Service
Hosted by ASSA ABLOY, dedicated for a single customer

Flexible maintenance scheduling option

Better system performance
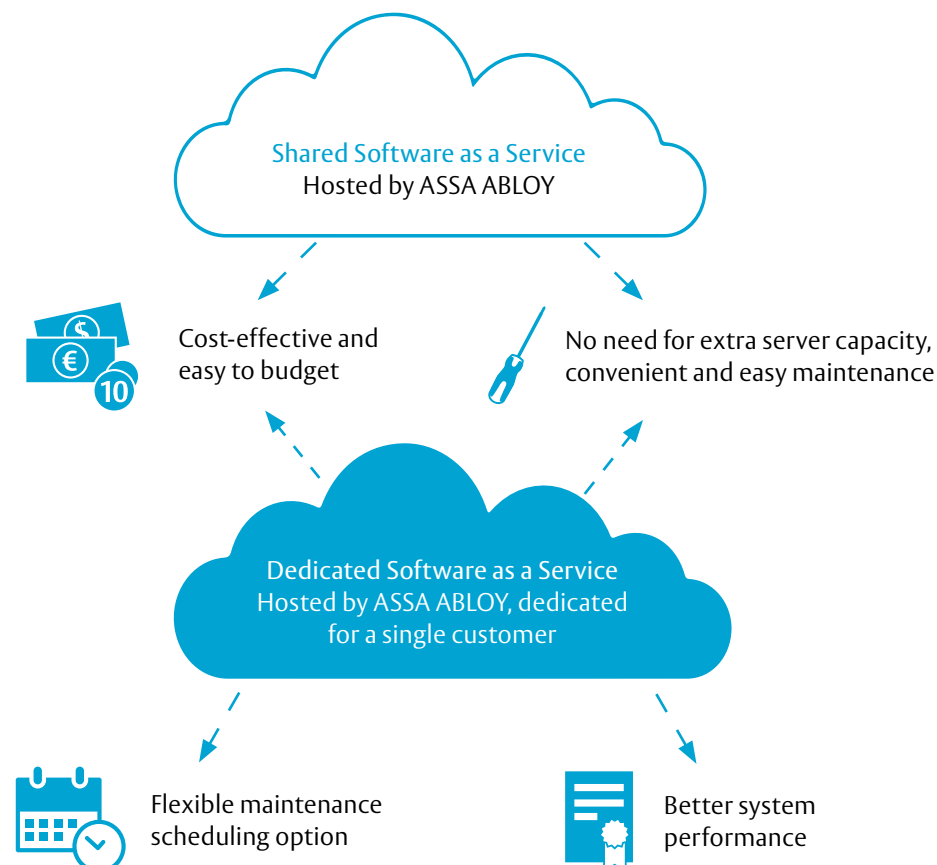

Option: In-House (on premises)

Hosted by customer, data remains within customer's premises
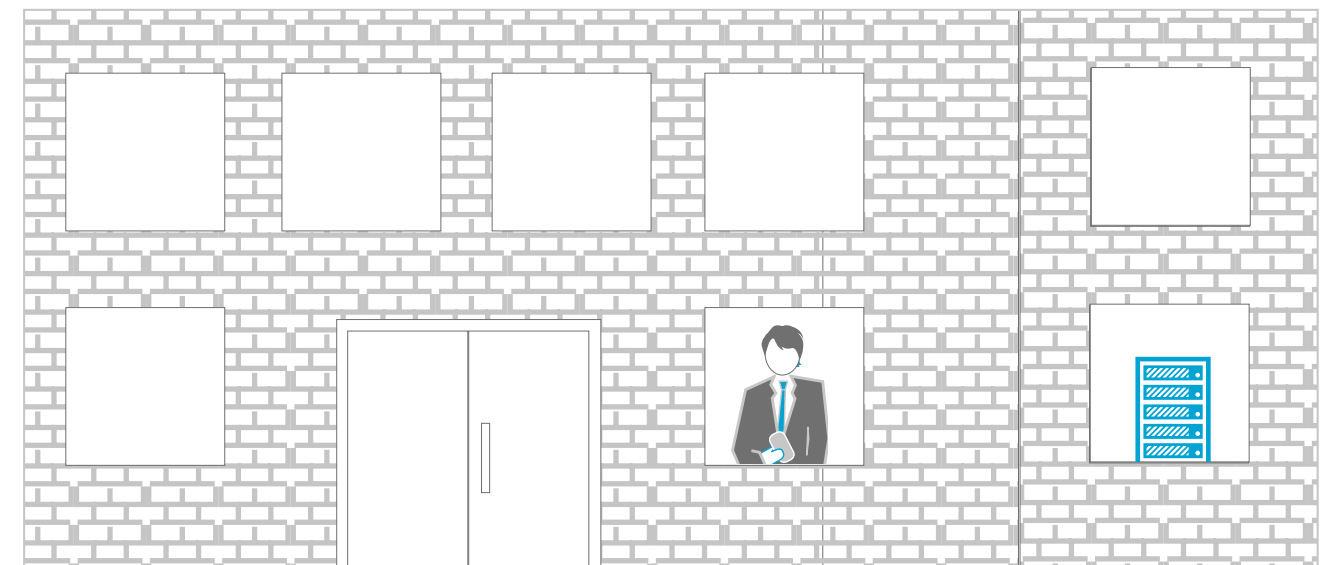

Enables hosting without Internet connection

Customer chooses data location and can restrict access to their business-critical information
