

Handle with Care

Code Handle® Door lock:
Keeps your patients and
medical equipment safe

ASSA ABLOY
Opening Solutions

Experience a safer
and more open world

Consulting rooms

Because examinations and consultations need privacy

Drug storage

Controlled drugs and other medicines are safely protected by a secure PIN locking handle

X-ray suites

Rooms with expensive and/or dangerous equipment deserve extra security

Hands-on!

4 digits separate your medical equipment or patient files from public access

Code Handle protects your private rooms with an electronic code. This way, only authorised people, like practice staff, can unlock the door. Enter the code on the handle's keypad and the door opens. Code Handle works together with your

existing locking unit: keep your cylinder or lock and just change the handle to a battery-powered Code Handle. No need to cable the door, connect it to the mains or install an electronic access control system.

Did I lock the door?

Don't worry about locking your door, Code Handle locks it for you

Auto-lock

How often do you enter and leave your consultation or examination room? No more needing to remember to lock up.

Easy to install and retrofit

All it takes is two screws to fit a Code Handle on almost any interior door. You can set up to 9 different user codes.

Keyless and convenient

Secure your rooms with no keys, no wires and no expensive access control system. It's simple with Code Handle.
