

Put guest satisfaction and safety first

TESA Hotel: Access control for hotels, holiday rentals and more

ASSA ABLOY

Experience a safer and more open world

Why struggle with a system based on mechanical keys?

With a robust digital wireless access control system like TESA Hotel, your guests enjoy convenience,

flexibility and security and your business benefits from cost and time savings .

At the reception

In the room

Digital solutions

Designed for hotels, tourist apartments, holiday rentals and other hospitality settings, TESA Hotel makes guests' convenience and security a priority.

1. TESA Hotel software enables managers to easily administer the system for quick and efficient check-in and check-out.
2. When guests arrive, they receive a smartcard or mobile key programmed with their dates of stay. For extra convenience, a separate credential can be issued to each room occupant.
3. No more messing about with room keys: A digital credential provides guests with quick and easy room access.
4. Guests insert their card into the energy saving device mounted on guest room walls to activate power in the room. When they leave, they remove the card and the device shuts down lights and electric sockets.
5. Individual smartcards can also be used with a room safe.
6. With the Openow™ app, guests skip check-in queues and unlock their room by smartphone.
7. Enable Check-in By PIN and guests can arrive and enter key-free at any time, with no need for a 24-hour reception desk.

TESA Hotel – Security and convenience

Electronic door security which is easy to install and simple to use enhances every stay at your property.

“With just one smartcard, I can open my room and the safe. It’s so convenient.”
Guest

TESA Hotel is a flexible, wireless solution which provides the convenience and peace of mind that comes with a secure, user-friendly way to unlock rooms.

A straightforward step up from mechanical keys, the TESA Hotel product portfolio was developed specifically for small accommodation businesses. It includes locks and cylinders for room doors, an energy saving device for mounting on guest room walls and a safe operated by the same programmable credential.

TESA Hotel has a solution to keep guests happy and safe — and looking forward to their next visit.

“I received my room key direct to the Openow app. When I arrived, I went straight to my room with no reception queue.”
Guest

Everyone who runs a hotel, holiday rental or apartment complex is familiar with the problem of lost keys. It’s not just an annoying waste of time, but also an expensive and unnecessary cost to the business.

TESA Hotel is a flexible, cost-effective way to bring guest security into the 21st century, replacing keys with “mobile keys” on a smartphone or a smartcard. It saves both time and money. TESA Hotel hardware is backed by clever software which enables hotel managers to easily administer their locking system and streamline check-in and check-out procedures.

If a room card gets lost, a new card can be generated in the system software and reissued. There’s no need to change the locks or get new keys cut. Mobile keys on a smartphone are even more secure, because phones are rarely lost and their PIN or biometric security stops anyone using the credential.

It's so easy to manage a TESA Hotel system

Main features at a glance

Guest check-in/check-out

- User friendly software for easy check-in and -out
- Remote software management from any smart device (tablet, smartphone)
- Integration with PMS systems and self check-in kiosks
- Cards programmed with number of nights/expiry date
- After expiry date, credential ceases to be valid

Contact-free, 24-hour arrivals

- Guests using Check-in By PIN can arrive whenever they choose and bypass reception
- Smartphone "mobile keys" are stored securely inside the Openow™ app
- PINs and mobile keys expire automatically, or managers can extend or cancel them anytime
- When guests enter the room, the manager receives a message confirming their arrival

Access rights and audit trails

- Managers can program credentials or PINs to allow access to certain areas
- Cards, app and PINs can be used to access common areas
- Credentials can be programmed to open the entrance door out of hours
- An audit trail provides complete visibility showing who has entered and when
- Staff and contractors can use the same credentials as guests

TESA Hotel adapts to any type of building

This modular, wireless system can be integrated with your existing doors and rooms

TESA Hotel software

No special IT skills required. TESA Hotel software enables managers to easily administer the system, reprogram cards, and check guests in or out.

TESA Hotel credentials

Wireless locking devices are compatible with smartcards and other RFID credentials, as well as the Openow mobile app.

TESA Hotel room devices

Card and card-less energy saving devices help hotel managers reduce their energy bill. A safe provides convenient security for guests' valuables.

TESA Hotel door devices

Locks and cylinders with integrated reader are battery powered and wireless to install. They are available for interior and exterior doors in a variety of finishes and designs. A wall reader can add access control security to main entrance doors. Door devices with PINpad work with Check-in By PIN option. An electronic padlock and a cabinet lock complete the TESA Hotel product family.

Broad choice of handles and finishes

Because we know every hotel and holiday rental has to be unique, the TESA Hotel product range features door hardware in multiple designs, colours and finishes. Whether you need modern door devices to make a contemporary design really sing, or low-profile

handles to blend in with more traditional interior decor, you will find TESA Hotel products which work in harmony. Door devices are also available with optional antibacterial coating.

At hotels, holiday rentals, tourist apartments, campsites and many more hospitality locations

TESA Hotel solutions have upgraded the guest experience at hotels, holiday apartments, campsites and farmstays worldwide including Harpazul, a new apartment complex close to Galicia's beaches. Stylish, wire-free electronic locks now secure its main access points, recreation areas and individual apartments.

A Check-In by PIN solution makes guest arrival safe and stress-free. Booking confirmation and follow-up messages provide each party with a unique PIN to enter Harpazul; move through common areas; and access their room.

"This way we offer a better service to the customer because they don't have to queue at reception," says Harpazul's Roi Casal. *"It is as easy as sending the PIN via email."*

The ASSA ABLOY Group is the global leader in access solutions. Every day, we help billions of people experience a more open world.

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, businesses and institutions. Our offering includes doors, door and window hardware, locks, access control and service.

TESA ASSA ABLOY

The global leader in the development, supply and service of electronic access control systems for the hospitality market, including hotels, tourist apartments and more. With 35 years of experience in the hotel market, we offer a single comprehensive platform which exceeds the highest demands in security, design, ease of use and service for our clients.
