

Complete entrance solutions for manufacturing

ASSA ABLOY
Entrance Systems

High-performance interior,
exterior and specialist doors

Experience a safer
and more open world

The best doors are fast, safe and won't let you down

The best doors – interior, exterior or machine protection – provide peace of mind.

They keep pace with your workflow and access needs. They separate production areas and keep sensitive or controlled areas compliant and free from contamination, dust, and particles. They help maintain pressure and temperature. And they protect workers and help regulate access to all areas of your facility to keep it secure, even if there's a power failure.

In short, a great door helps keep productivity up, processes under control, downtime to a minimum and operations flowing swiftly, safely and smoothly, day after day.

Maximize flow, safety and uptime throughout your facility

Built to last, our complete range of automated entrance solutions meet the standards of the most complex manufacturing processes, from chemical and physical, to assembly and packaging.

All of our automated doors are available with numerous customization options, from configuration and settings, to color, size and a range of accessories.

And our expert consultants are always on hand to help you find the best automated entrance solutions for your facility.

ASSA ABLOY RP300

Interior Doors

Our high-performance interior doors are designed for areas where high traffic volumes and climate control are critical to your business.

Exterior doors

Robust and versatile, our exterior doors combine fast operation with tight sealing and excellent durability to keep processes running smoothly.

Exterior doors

RR5000

Pedestrian doors

Our complete range of automatic sliding, swing and revolving doors improve accessibility, safety, security and energy consumption.

Docking solutions

Our full range of dock levelers, shelters, loadhouses, restraint systems and accessories help keep workers safe and maximize the flow at your loading bay.

High speed, reliability

Protect your production environment against draft, dirt, dust, and humidity with a high-speed ASSA ABLOY door.

Separate areas without slowing operations down

With fast opening and closing speeds, our high-speed and rapid roll doors are designed for areas where high traffic volumes and climate-control are critical to your business.

Available with tight sealing, pressure resistance and smooth surfaces, our interior doors also provide complete separation for process areas that need to be isolated.

Rapid and reliable

When safety is a priority, traffic is frequent, and speed and looks matter, the ASSA ABLOY RR3000 series delivers.

Boost safety and security with speed and style

Robust and versatile, ASSA ABLOY exterior doors combine fast operation with tight sealing and excellent durability to keep processes running smoothly.

Engineered to endure round-the-clock operation and demanding conditions, our fabric, metal and rubber doors are efficient, reliable and secure.

Space-saving, speed and safety

From complete process isolation to open access within seconds, the rapid-moving ASSA ABLOY RP300 keeps workers safe and minimizes downtime.

Safeguard your employees and minimize downtime

Purpose-built to shield workers from fumes, heat, sparks and weld glare, and prevent dust, particles or contaminants from entering specific areas, our machine protection doors are the most effective safety barrier available.

Unlike light curtains, which can be physically breached, machine protection doors prevent workers from reaching into the process area and bringing production to a standstill. And they take up much less space on the shop floor as there is no need for light barriers.

Safety you can rely on

Wherever the risks are at your loading bay, ASSA ABLOY has a solution to keep workers safe, and minimize the risk of accidents or injury

Minimize risks during loading and unloading

To make loading areas a safer place to work, the right equipment and regular maintenance is key.

ASSA ABLOY offers a full range of dock levelers, shelters, loadhouses, restraint systems and other docking accessories to keep workers safe and maximize the flow of goods, people and vehicles at your loading bay.

Ensure easy, safe access to your facility

Maintain a comfortable indoor environment and ensure people can come and go easily and safely with our automatic pedestrian entrances.

Our complete range of automatic sliding, swing and revolving doors improve accessibility, safety, security and energy consumption into, out of and through your facility.

Keep processes running smoothly with fast, efficient service

Our doors set industry standards in safety, security and convenience. Like all equipment with multiple components and moving parts, automated doors need regular maintenance to stay in great working order.

We offer the industry's most complete, flexible service solutions, including regular safety, compliance and quality control checks. And our trained and certified technicians respond quickly to any issues to ensure that your doors are fully operational, and downtime is kept to a minimum.

Our service options include:

- Always available, 24/7
- Original spare parts manufacturer
- Service for all doors, regardless of brand
- Operations always according to current regulations
- Appropriate documentation provided on site

Together we build the future

ASSA ABLOY is the global leader in access solutions.

Everyday we help people feel safe, secure and experience a more open world.
