

Integrated Healthcare Access Solutions for Safety and Efficiency

Protect, seal, secure and separate

Easy, hands-free access, and entrances that support meticulous hygiene and safety standards play a critical role in healthcare facilities.

Protection and access are key

To provide the best standard of care for your patients, and a safe environment for your staff and visitors, it's crucial that every door in your facility is suited to purpose. As needs differ from area to area, the right entrance solution is vital to aid access, support working processes and provide an effective barrier against the spread of contagions.

Touchless access ensures easy, hygienic access

With a wall-mounted ASSA ABLOY Magic switch installed either side of an entrance, access is hygienic and hands-free. By simply sweeping a hand above the surface of the device, the door automatically opens without the need for contact or pressure.

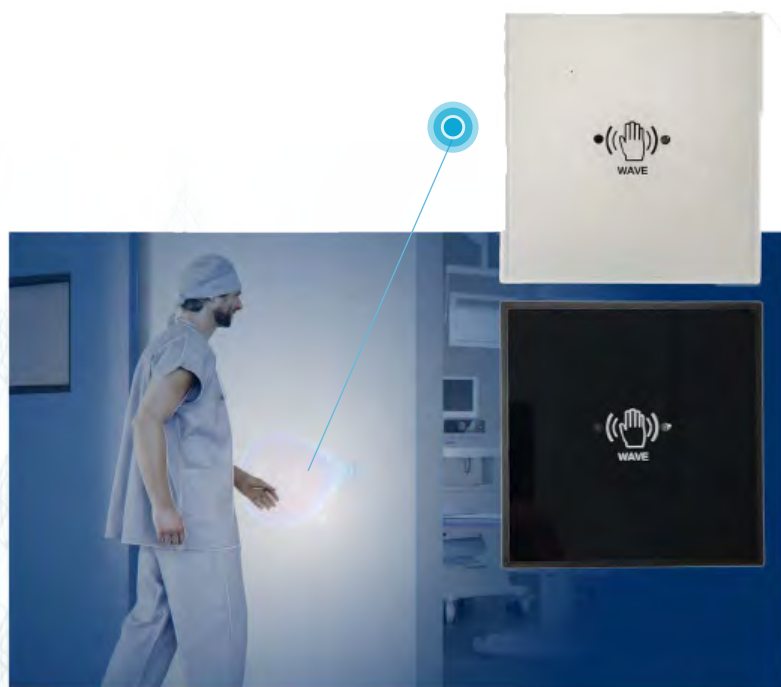

Activation sensors are ideal for all-access entrances. As a pedestrian approaches the door, it will automatically open, without the need for hand or elbow contact to push a switch.

Control, speed and comfort for all healthcare environments

From major entrance points and ambulance bays, to patient treatment areas, critical care units and isolated environments, our complete range of automated entrance solutions protect, seal, secure and separate. And our doors set industry standards in hygiene, safety, security and comfort.

Keep processes running smoothly with fast, efficient service

We offer the industry's most complete, flexible service solutions, including regular safety, compliance and quality control checks. And our local certified technicians respond quickly to any issues to ensure that your doors, no matter the brand, are fully operational, and downtime is kept to a minimum.

The right door can improve healthcare operations

Many of our solutions are available with customization options, from configuration and settings, to color, size and a range of accessories. Our expert consultants are on-hand to help you find the best automated entrance solutions for your facility.

Automatic swing door

For maximum convenience and security, space-saving automatic swing door systems with access control ensure traffic flows smoothly and safely

Hermetic or TightSeal sliding door

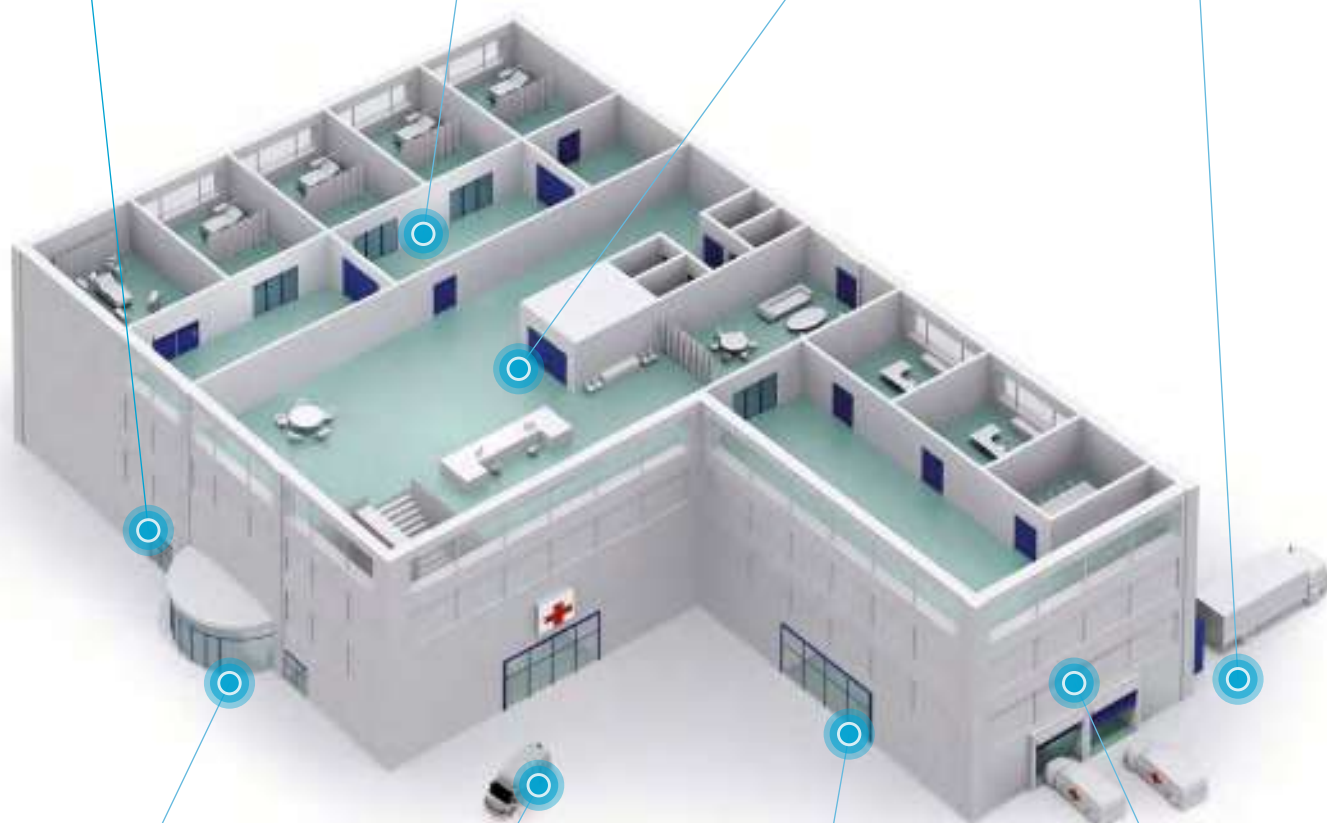

For controlled environments, Hermetic and TightSeal sliding doors help maintain sterile zones and prevent biocontamination in critical areas like operating theatres and intensive care units

Cleanroom door

With smooth, easy-to-clean surfaces that meet stringent hygiene requirements, ASSA ABLOY cleanroom doors with access control regulate airflow and help minimize contamination

Dock levellers and dock shelters

For easy access and safe loading, dock equipment and accessories support the rapid flow of staff, patients and supplies into – and out of – your facility

Revolving door

Revolving Doors guide pedestrian traffic smoothly whilst ensuring maximum safety and convenience with minimal user effort. Revolving doors are also ideal when climate control is a priority

Service

Our service technicians are always close by and equipped with spare parts and the technical knowledge to service your ASSA ABLOY Entrance System doors – and all other brands

Sliding door

To accommodate the smooth flow of traffic without compromising safety and energy savings, automatic sliding doors are ideal for busy healthcare entrances

Overhead sectional door

Space-saving, and well insulated, overhead sectional doors offer comfort, protection, safety and security for patients and staff, as well as property and equipment

Empowering your business

Your automatic entrances will run smoothly with ASSA ABLOY Entrance Systems taking care of planning, design, installation and service for the front, back and interior of your building – a commitment that extends throughout the product lifecycle.

Support through the entire building process

You only need one partner for your automatic entrances. Together with you, we work to align all processes and ensure adherence to deadlines and schedules. You can be assisted with:

- Project management and budgeting
- Specification, drawings and bespoke solution design
- Safety standards, codes and regulations compliance
- Planning the flow of goods and people
- LEED and BREEAM consulting
- BIM objects

Focus on your business, not your doors

Keep your doors running with our service agreement. We ensure the highest standing fix rate in the industry with our standing stock of original parts for all types of automated doors and docking solutions – no matter who made them. Our trained service experts make sure your business stays compliant with local regulations, and can help lower the total cost of ownership for your doors with proactive modernization, supported by the latest digital and connected technology. And in case of emergency, we are in your area available 24/7 to get your business back on track.

Open your door to sustainability

Make your company more sustainable with our energy-saving solutions. Minimize energy loss, improve indoor air quality, increase daylight, control air circulation and optimize the overall energy performance of any building. And in our own production, sustainability considerations drive everything we do, from sourcing to recycling.

Together we build the future

ASSA ABLOY is the global leader in access solutions.

Everyday we help people feel safe, secure and experience a more open world.
