Yale

Smart Solutions

Turn your smartphone into your key. The intuitive Yale Access app lets you manage the access of your home remotely.

Yale is trusted by millions of people every day to keep what's important to them safe.

Our innovations have protected their homes, families and belongings for over 180 years. We have expanded from being a leader in mechanical lock engineering to innovating connected smart locks and homes. Because we always make every effort to push the boundaries in a changing world.

We were there for your grandparents (and probably theirs) and we'll be there for your children.
Today, and every day to come.
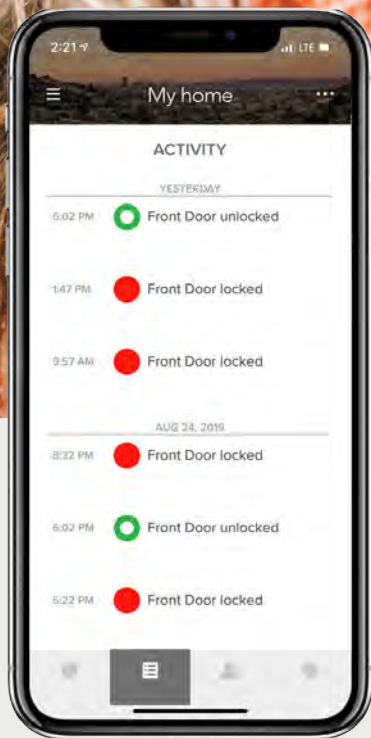

The Yale Access functionalities

App control

Lock and unlock your door from your app, anywhere in the world.

DoorSense™ technology

The lock will check the status of the door and tells you if your door is securely closed and locked.

Activity monitoring

See who comes and when with the Activity Feed. Check who unlocked the door and if or when it was actually opened. Set-up alerts to notify when specific people arrive home.
Guest access

Grant unlimited digital keys valid for a few weeks, a few hours, or a few minutes. Never worry about lost or stolen keys again. (App access cannot be copied like a key)

Grant entry from wherever you are with the Yale Access app

Remote access means you can let in family, friends and trusted visitors like the cleaner or the delivery driver – from anywhere – when Yale Smart Lock is paired with Yale Connect Wi-Fi Bridge. If someone forgets to lock when they leave, you can take care of it with the tap of a finger.

Yale Connect Wi-Fi Bridge

For voice assistant functionality and
remote access and control of your lock.

**Keep your
home secure**

Check if your door is
locked from anywhere

**Monitor access
from anywhere**

Always know who is
coming and when

**Control who
has access**

Let visitors in and out
when you aren't home

**Enable voice
assistant**

Yale Access Module
