## Care and Maintenance

### Metals and Finishes

Keeping any metal clean is important. Dust, which is usually chemical active, and moisture, which is often acid, are principal natural hazards. Simple but regular cleaning is more successful than severe sporadic treatment.

#### Black Antique

Using a soft cloth, apply a light oil to the entire surface and buff to dry.

#### Brass (Not Lacquered)

Brass is an alloy of copper and zinc, with copper being the main component. Copper reacts to the atmosphere by producing a natural oxidation (patina) of it's surface which when completely covered, resists further attack from the atmosphere. Patina is often a dark green colour, however, can also display different shades. Occasional light wash with soapy water, dry thoroughly - this will still allow the natural patina to remain. If you prefer a fresh brass look, occasional use of Brasso.

#### Lacquered Finishes

Regular dusting is required. Occasional light wash with soapy water, dry thoroughly and buff lightly to remove any water marks.

#### Plated Finishes

Regular dusting is required. Occasional light wash with soapy water, dry thoroughly and buff lightly to remove any water marks.

#### Stainless Steel

Regular dusting is required. Occasional light wash with soapy water, dry thoroughly and buff lightly. When fitted externally, use GT85 PTFE (or similar) spray on a soft cloth to clean any dirt/contaminants, or discolouration.

#### PVD

Regular dusting is required. Occasional light wash with soapy water, dry thoroughly and buff lightly to remove any water marks.

## Guarantees

**10 Year  
Mechanical**

**25 Year  
Mechanical**

**BS EN 1634** European Fire Safety Standard entitled "Fire resistance and smoke tests for door and shutter assemblies, openable windows and elements of building hardware. Part 1: Fire resistance test for door and shutter assemblies and openable windows." Fire evidence for individual items for door hardware means they are suitable for consideration for use on a fire door, it does not mean that the product can be fitted to every fire door. Any evidence gained must show that the hardware did not affect the integrity of the fire door-set in which it was tested with.

**FD30/60 TIMBER**  
30/60 minute fire doors
