**Escape function:**

Exterior handle controlled by electronics, interior handle always engaged (request to exist sensor included)

Upgrade to Aperio and take control of your security doors

The Aperio L100 Lock is the most complete electronic wireless security lock on the market.

Electronically controlled, the wireless device provides not only the highest levels of physical protection, but also transmits comprehensive information on door status to the access control system. This sophisticated solution, the latest in wireless access control technology for security doors, provides a highly cost effective, straightforward alternative to a wired high-end solution as no cabling or alterations to the doors are required during installation.

Aperio supports the following RFID technologies:

iCLASS, MIFARE CLASSIC, MIFARE DesFire, MIFARE PLUS and Seos

No matter what your door requirements are Choose from a wide L100 lock range

Available for standard or narrow profile doors. Also with escutcheons or keypad reader.

European profile

Finnish profile

Scandinavian profile
