Experience a safer and more
open world

Traka Touch is a sophisticated key management system that has intelligence built in. It can operate as a standalone solution that requires no IT network or server to manage the database. Alternatively it can be networked with our enterprise solution Traka Web.

A full audit trail of all key transactions is retained within the system by the internal solid state memory. Management of the system has never been so easy.

General

- Keys are readily available 24/7
- Access by authorised users only
- 7" touch screen
- Full audit trail of all users and key transactions
- Secure storage and management for up to 180 keys
- Easy access via PIN code, card reader and biometric fingerprint reader
- Battery backup
- Soft close-down with no data loss in the event of long term power failure

Standalone

- Cutting edge key management solution that operates entirely independently of your IT system
- Standalone 'plug and play' system
- No network, PC or external connection required
- USB port for import/ export of reports via memory stick
- Automatic data back up to removable SD card

Networked

- Full network capability and management through Traka Web
- Centralised administration and reporting
- Browser based for remote administration

Optional Features

- Reason/Fault logging and Access Schedules
- Card reader
- Biometric fingerprint reader

"With Traka Touch we have been able to quickly and easily improve our key management at store level. We are planning to install a system at every one of our stores throughout the UK. It's a brilliantly simple but effective solution which makes efficient key management incredibly straightforward for both staff and managers. What's more, because it's standalone, it is easy to deploy locally without having to involve staff from the corporate IT team or head office."
