

The *i-minimal* Electronic Door Lock

When less is much more

ASSA ABLOY

Experience a safer
and more open world

The new electronic door lock for hotels. Invisible on the outside, invincible on the inside

Give your guests security and convenience — without sacrificing door aesthetics

In the words of Coco Chanel, “*Simplicity is the key to true elegance.*” The design for our new *i-minimal* electronic lock follows this ethos. It fits any type of decoration or architectural style, including the most avant-garde.

This new lock is not only beautiful and elegant, but also innovative. Behind a **simple, stylish exterior**, the *i-minimal* lock hides extraordinary strength. A robust electronic lock, it offers your guests the greatest possible security.

Cutting-edge TESA Hotel technology can also provide a **complete access control system** to match an aesthetic which minimizes visibility of door lock components and reduces their visual impact on hotel entrances.

Beauty, intelligence and design combine in the unique *i-minimal* Electronic Lock.

**Access control that
cannot be seen**

**Doors locked with
total discretion**

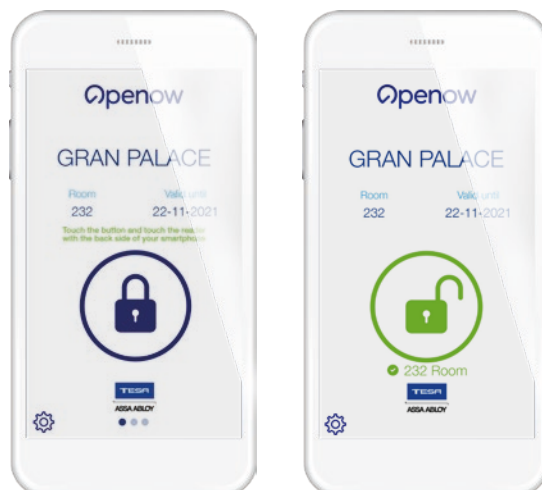

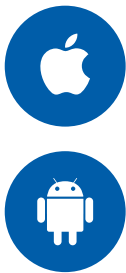

**Minimalist design,
complete security**

It cannot be seen, but its presence is felt

The new *i-minimal* is not just our most intelligent lock to date. It also combines the convenient features of electronic access control with the **security of an electromechanical lock**. It is compatible with multiple TESA Hotel software management systems: Read and Write, Wireless Online, plus our solutions for **opening via mobile**, Openow BLE and the TESA Hotel Remote app.

Additional security features include:

- Encrypted and protected card information
- Opening of locks using a Smartphone (BLE technology): [App Openow®](#)
- Remote opening of locks via Smartphone (Internet): [TESA Hotel App](#)
- The most advanced identification technologies

• New and minimalist RFID reader module design.
Available in two finishes: black and white.

Includes blue and red alert LEDs

• Includes sensors to record the following events

- Opened door
- Improperly closed door
- Intrusion
- Use of cylinder

Includes internal electronic privacy button

Opening by RFID card, Bluetooth or wireless remote operation

Operation for 80,000 openings in wireless model or 105,000 in Read/Write model

Euro mortise lock, with panic exit and anti-card device

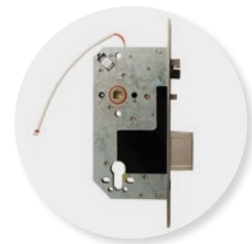

Automatic deadbolt (2.54 mm) and panic function

- Mechanical
- Compatible with any fixed DIN handle
- Outer handle turns freely with the door closed

• A mechanical half-cylinder may be added for emergency mechanical key opening

i-minimal gives you the choice

TESA has a **wide range of handles in different finishes** for installation with the *i-minimal* lock. These are compatible with different styles to help you find the design that suits your premises.
