This document is designed to provide ASSA ABLOY customers with a basic over view of the eShop ordering process. From order creation and item searching to order tracking

Experience a safer
and more open world

Home Page

The ASSA ABLOY eShop website logon page can be accessed from the URL <https://eshop.assaabloyopeningsolutions.nz> which can be saved as a favorite on your browser. A link is also available on the main ASSA ABLOY website <http://www.assaabloy.co.nz/en/local/nz/>

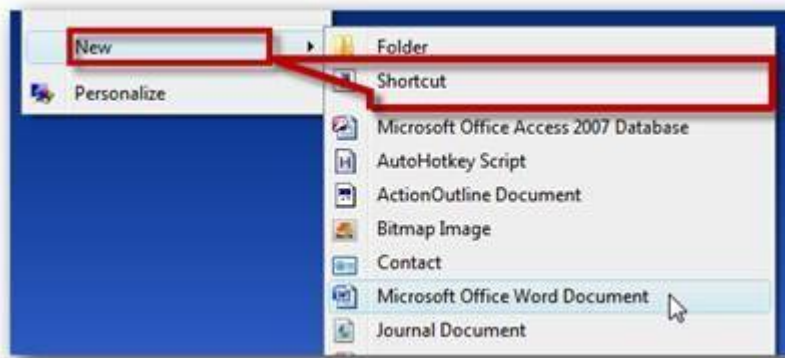

TO SAVE THE URL TO YOUR DESKTOP

The exact method may vary depending on the browser used and the computer, but the following method will generally work.

Highlight and copy (CTRL C) the URL from the web browser address bar

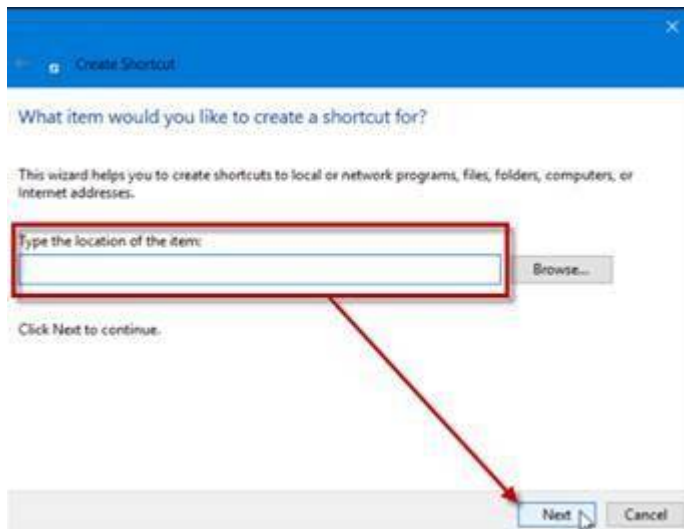

On your desktop right click where you would like the shortcut to appear.

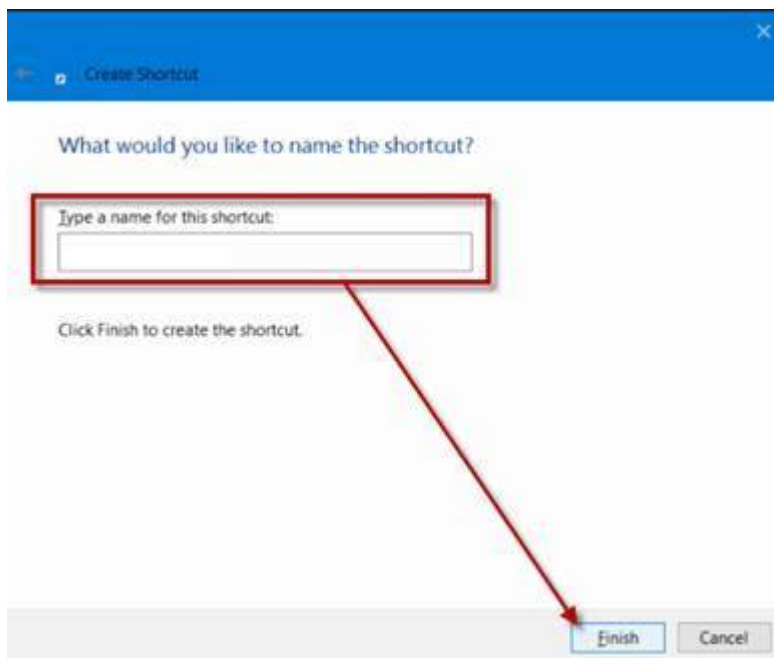

From the pop-up menu select "new" then "shortcut" and a wizard will open.

Paste (CTRL V) into this the copied URL from above and select "next"

Assign a name to the shortcut and select “finish”

The shortcut is now saved to your desktop as an icon

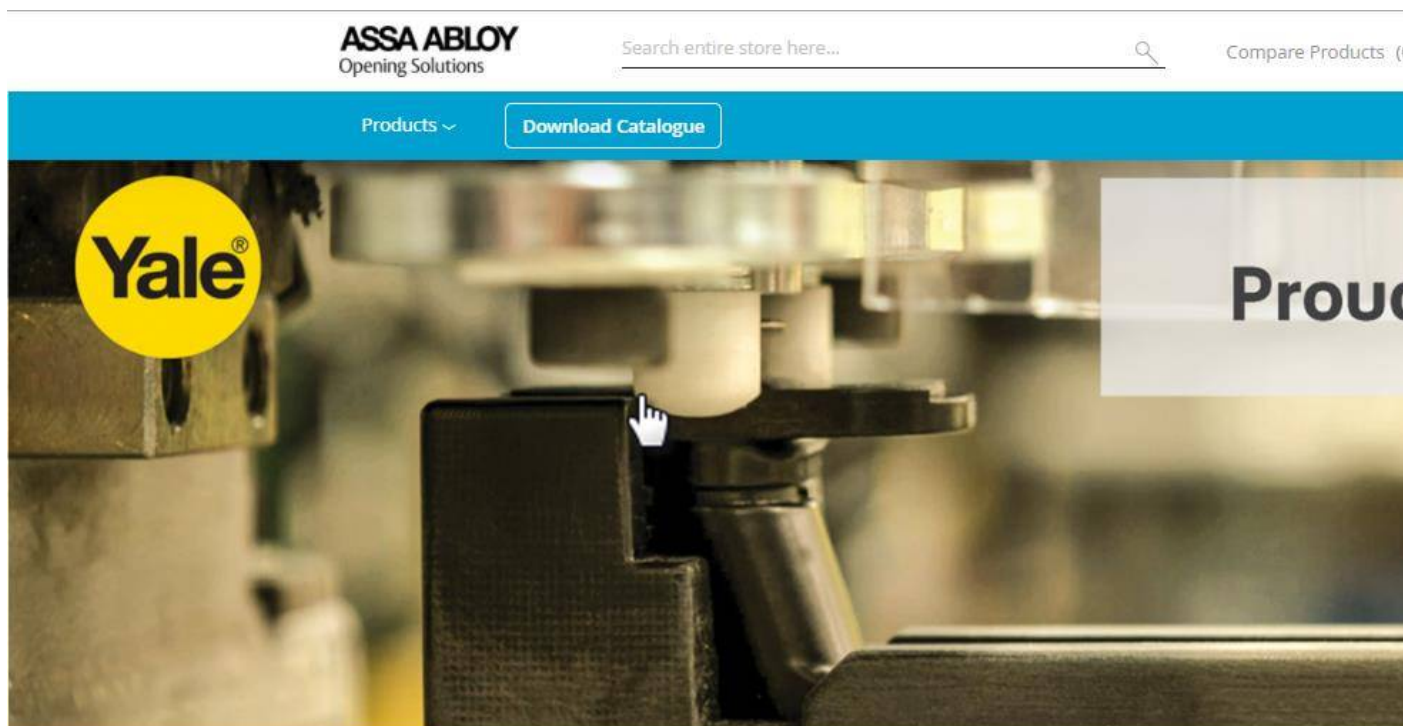

ASSA ABLOY eShop is supported by Microsoft IE10, Google Chrome, Firefox and most common web browsers.

The Export to PDF functions allows customers to create custom made PDF catalogues for their or their customer use. There are two options for using the PDF Generator:

- Login with their user name – this will create a PDF catalogue with the pricing for that customer.
- Without logging in a PDF catalogue can be created with no pricing, suitable for end users.

Once you are happy with your selections simply select either “Generate PDF” or “Generate Excel” to create your document. Only once can be done at a time, however the selection is not cleared by the system so no new selection is required to create a different output type

The Generate PDF option provides a catalogue type document that can be used internally or for customers to view (provided pricing is removed) whilst the Generate Excel provides a list type document that could then be sorted and/or uploaded into an ERP.

If a user is logged in then they will see any restricted items they are able to purchase and by default they will see their pricing as it appears in eShop. If the user is not logged in they will see only the default items available to all customers and no pricing is displayed. Also if the user is logged in but does not want a priced version then this can be suppressed in the browser by selecting “Hide Price”. The PDF/Excel will still contain the restricted items but no pricing.
