

How to download and set up Openow™

1

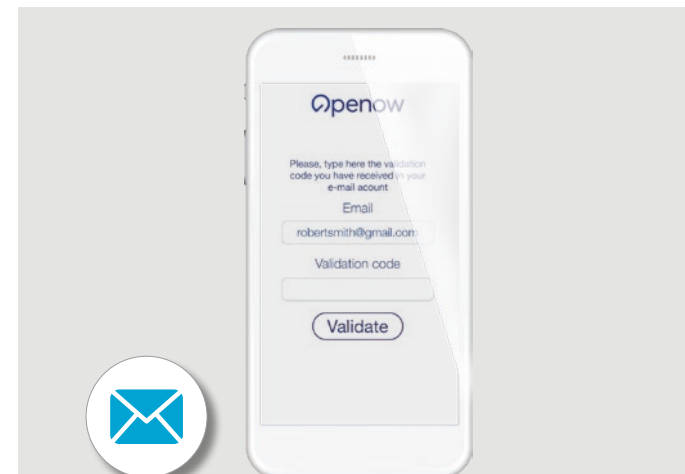

Download Openow™ App from the Apple Store or Play Store.

Note: The App will detect the device's language settings.

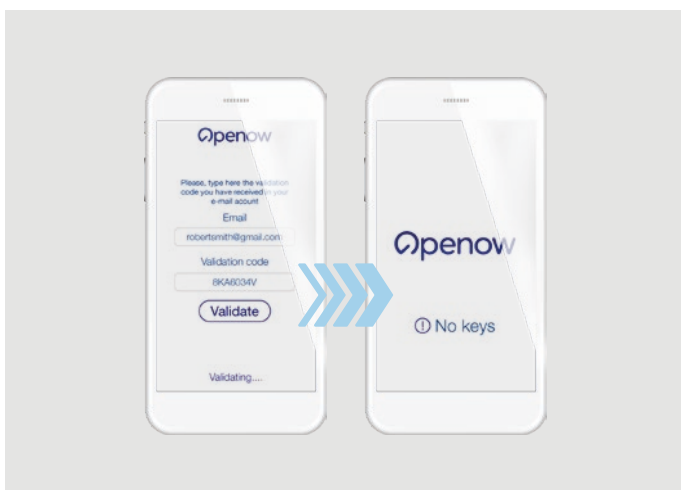

2

Access Openow™ App, add your email address and validate so you can register in Openow™.

3

You will directly receive an email from **openow@assaabloy.com** with the verification code/link.

4

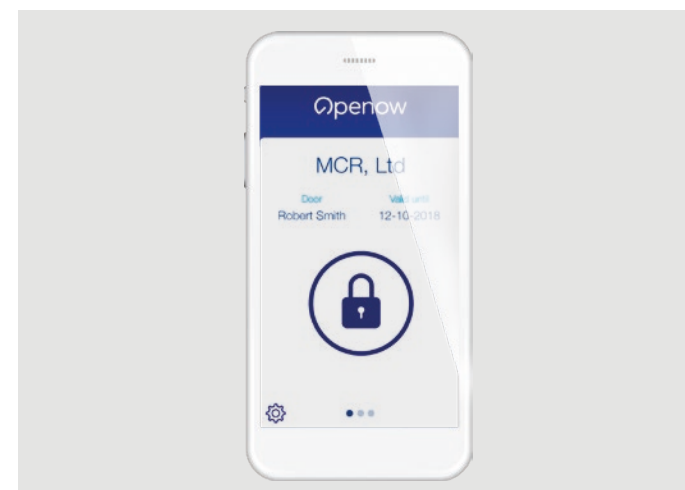

Verify the link or enter the verification code directly in the App and you will be registered.

Note: Virtual keys need to be sent now to your App.

5

You will now receive your Openow™ virtual key that gives you access to all doors where access permissions have been granted for you.

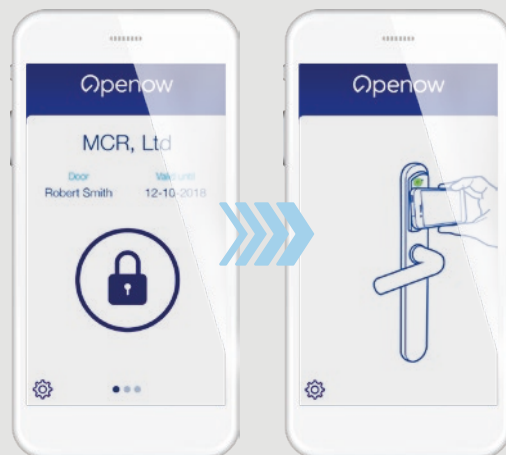

6

You are done! You have now your Openow™ virtual key. In addition, you can have as many keys of different facilities as you want.

How to use Openow™

Door Management

1

Press the padlock to open the door, then, put the smartphone against the lock as per the illustration.

A

B

C

2

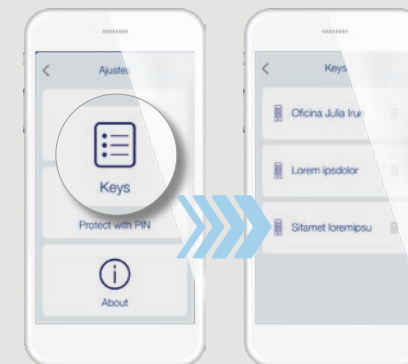

A. Green padlock - door is opened.

B. Orange padlock - Cannot connect to the door, try later.

C. Red padlock - No access rights have been granted, blocked door or out of defined time schedule).

Virtual Key Management

Go to the “Settings” menu and click on the “Manage keys”. You will see a list of all the keys you have. You will be able to delete the key directly by clicking on the recycle bin.

Security PIN

Go to the “Settings” menu and click on the “Protect with PIN”. Enter your new PIN twice and confirm.

Every time you open the App you will be requested to enter the PIN.
