

Our Expertise. Your Mission. Shared Success.

Hangar & Large Application Doors

The Hangar & Large Application Door division of ASSA ABLOY partners with defense organizations to protect aircraft, personnel, and critical assets across secure facilities around the world. HLAD designs, manufactures, installs, and services custom door solutions for military, aerospace, defense & government industries. Our doors are engineered for reliability, quality and performance, ensuring operational efficiency in the most demanding environments.

Why ASSA ABLOY?

The first vertical lift fabric Megadoor™ was installed in 1977. Since then we have installed over 10,000 doors globally. For over 40 years, our technology has proven to be more reliable, energy efficient and lower maintenance, in the world's harshest climates, than any other large door system.

Support Progressive Design Build

With early collaboration, dedicated project team mitigating risks, manufactured in America, and accelerated project execution.

Aligned with DoD direction on OTA

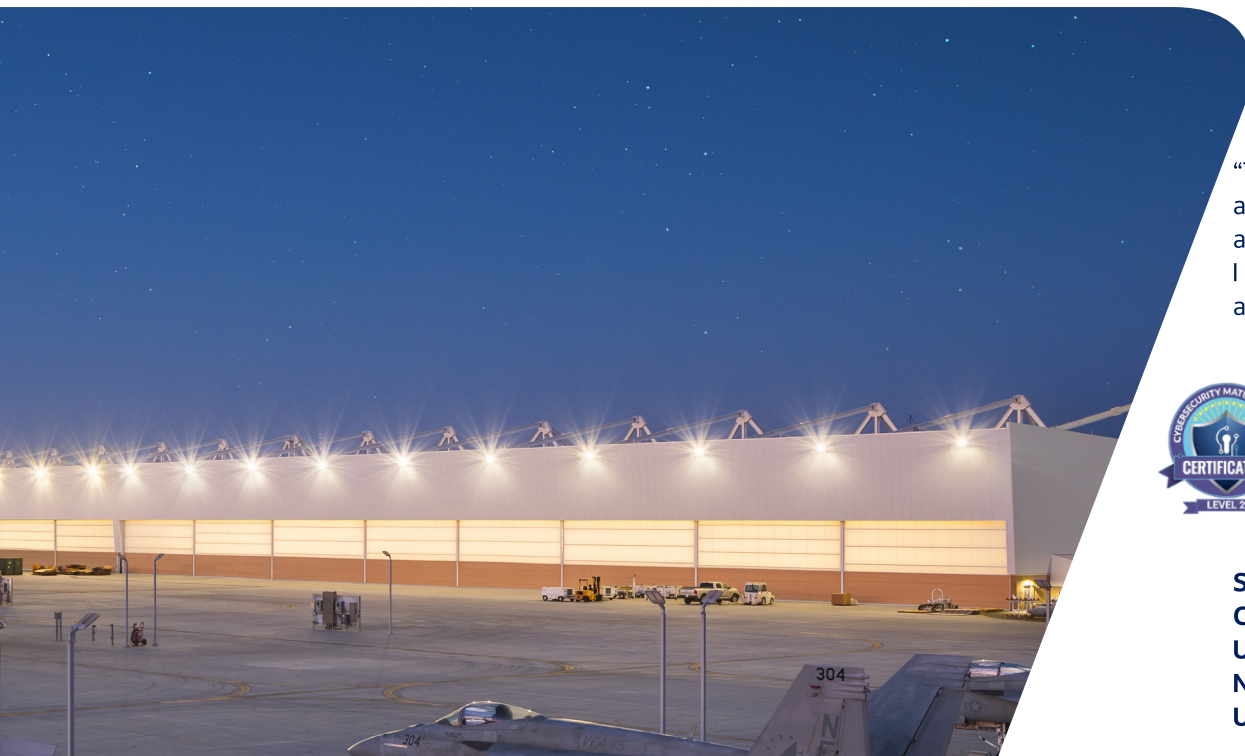

Providing the right solution for your opening with retrofit, modernization of current equipment, service options or new equipment (fast track), our team will work with you.

A Trusted Global Partner

Accelerating Mission Critical Infrastructures

Large Opening Solutions

Doors for heavy industrial applications need to withstand harsh conditions such as, mud, dirt, dust, moisture, corrosive and abrasive materials, high wind loads, and a wide range of temperatures.

ASSA ABLOY delivers solutions where size, performance, and operational demands exceed the capabilities of traditional door systems.

- **Vertical Lift Fabric Megadoor®** fast, energy efficient, withstands extreme temperatures, no size limitations
- **Horizontal Rolling Door** can be utilized with full floating, unidirectional and bi-parting door leaves to accommodate the facility demands

Core Capabilities

- **Reliable** - fast opening speeds supporting aerospace, aviation, and defense operations worldwide
- **Durable** - rugged designs to handle extreme environmental and operational conditions
- **No size limitations** - custom engineered solutions for every need, designed to fit your opening
- **Low Maintenance** - solutions that reduce downtime and support long-term facility performance
- **Energy efficiency** - excellent airtight seal and resistance to high winds and also available with translucent fabric to maximize natural daylight and reduce energy costs.

Trusted partner at every stage

ASSA ABLOY stands by our customers starting from design phase through installation and beyond. Ensuring extended life of your assets.

This partnership helps customers reduce risk, optimize performance, extend and realize greater value from their investments over time.

Supporting DoD infrastructure modernization

Helping the government increase operations efficiency, reduce maintenance impacts and enhance daily readiness without the cost and disruption of full replacements.

+1500 doors installed in military & aerospace globally

Bringing proven performance, nationwide support and mission focused expertise to every project and supporting the government's modernization objectives for over 40 years.
