Specification Service

For all Architectural hardware specification assistance refer to your local ASSA ABLOY Sales Office.

A fully comprehensive, obligation free, Architectural Door Hardware specification can be prepared by Architectural Hardware Consultants.

Cleaning

Care should be taken during construction/refurbishment to ensure that paint, thinners, mortar or cement splashes are carefully removed from locks, furniture and hardware. Removal of these splashes with strong cleaning agents or scourers should be avoided.

Dirt and grime should be regularly removed with a soft and clean cloth. Do not use solvent based or abrasive cleaning agents. During cleaning, care should be taken to prevent cleaning solution from entering the cylinder keyway. Surfaces should be dried and possibly lubricated.

Yale Bottom Door Seals

Fire Rated Automatic Bottom Door Seal

A concealed automatic door bottom silicon seal for medium temperature smoke and fire door applications.

The YBDS-CMFR Series is spring loaded to lift clear off the floor as soon as the door leaf is opened by a few millimetres.

Mounted into a 14mm x 34mm groove that has been mortised into the bottom edge of the door, it is operated automatically by pressure against the door jamb on its adjustable strike block. When fire is present the intumescent strips which are fixed in two wings will immediately expand to block the gap between door and floor completely. The seal will maintain integrity and insulation for 90 minute fire doors.

- Location Single and double butt hinged doors.
- Fire Rating 90mins
- Min/Max Gap 3mm to 15mm.
- Seal Sizes 380mm, 480mm, 610mm, 810mm, 910mm, 1060mm, 1210mm, 1500
- Standard Finish Aluminium Anodised
- Seal Material Silicon Rubber (SE) (grey).
- Fixing Method Concealed, with supporting colour matched stainless steel escutcheon plates. Screws supplied.
- Adjustment Has adjustment strike block screw for sealing action adjustment.

Model No	Product Description

Astragal and Meeting Stile Gasketing - Split Astragals

- Astragals and meeting stiles on double doors often present problems because of complex conditions and requirements. Pemko offers some simple and inexpensive solutions as well as more detailed ones. Each job should be carefully studied as to the specific requirements when selecting the appropriate gasketing. Note that some astragals consist of two parts, one for each door, and should be ordered as such.
- Punched with slotted holes for adjustment.
- Astragals and meeting stiles with a fire label may be mounted on pairs of doors wherein the gap meets the requirements of NFPA 80, 2-3.1.7 "The clearance between...the meeting edges of doors swinging in pairs on the pull side shall be $1/8" \pm 1/16"$ (3.18mm \pm 1.59mm) for steel doors and shall not exceed $1/8"$ (3.18mm) for wood doors."
- All clear anodized brush products are supplied with gray brush (available with black brush upon request). Other finishes supplied with black brush.

A (Mill Finish Aluminum) • BDG (Bright Dip Gold Anodized) • C (Clear Anodized) • D (Dark Bronze Anodized)
 G (Gold Anodized) • PW (Painted White) • SN (Satin Nickel Anodized) • Special finishes available upon request
