

Aperio® KL100: traceable, convenient, secure access for cabinets and lockers

ASSA ABLOY
Opening Solutions

Experience a safer
and more open world

In healthcare, locking cabinets doesn't need to be a pain

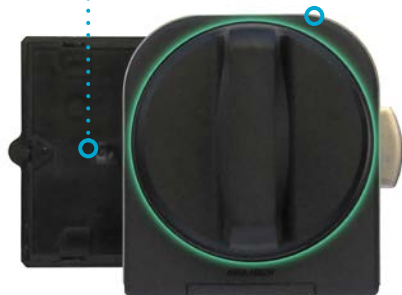

Security is vital for many different openings in a healthcare setting. Unfortunately, traditional locking which relies on mechanical keys may not be sufficient.

Physical keys are easy to lose. For sensitive openings like drugs cabinets, they also need careful tracking and monitoring — which can be a real time-waster, as can waiting for the authorized keyholder to unlock a cabinet for you. And when a sensitive key goes missing, replacing locks and rekeying causes more delays, more expense.

*Fortunately, there is a better solution.
Experience traceable, flexible, digital cabinet access
with the Aperio KL100 Wireless Cabinet Lock.*

Electronics and
functionality are in the
outside part of the unit

Discrete with minimum
footprint and
contemporary design

Adjustable for
left/right doors

Five different cams
available

Four lock versions: 19 and
22 short for thin metal
doors and 19 and 22 long

Install without wiring. Minimum footprint on your furniture

Flexible

Fits metal and wooden doors

Compatible

Cams for almost all cabinet types

Smart

Reads industry-leading RFID and mobile credentials

KL100: Healthcare applications

Medicine Cabinets

- Audit trails identify who unlocked cabinet and when, for greater control over medicines
- Staff no longer waste time waiting for the keyholder: they carry their own programmable credential
- No more worries about lost keys: cancel credentials with a click

Staff Personal Lockers

- Reliable security for valuables and other belongings without the hassle of carrying a mechanical key
- No worrying that someone has copied a locker key: old or missing credentials are quickly cancelled
- Full control with one single database

Bedside Cabinets

- Secure storage for patient medicine, in cases where they can self-medicate
- Ensures patients have responsibility for their own belongings
- On-demand audit trails simplify incident investigation
- Save time spent verifying patients have taken their medicines: check locker access via software rather than bed-by-bed

EMP Carts

- Monitor usage to ensure nursing and pharmacy staff are accountable
- Reduce investigation times with easy audit functionality
- Ideal for mobile carts which are shared between departments

Drug cabinets

- Tailor-made access for every nurse, to get patient medicines faster
- A choice of real-time management for instant access or wall updaters to program on demand
- Easily programmable access for temporary staff and contractors
