CLIQ®
Local Manager

Powerful local software for
managing CLIQ locking systems

ABLOY

What is CLIQ Local Manager?

CLIQ Local Manager is an intuitive software package that helps you run a CLIQ key-based access management system efficiently from any standard PC.

Security managers and system administrators can easily perform all the tasks required for their building — programming keys, managing users, auditing access and more.

Unlike mechanical security, you can issue, reprogram or revoke a CLIQ key whenever you choose. Lost keys can't be revalidated.

How CLIQ Local Manager makes day-to-day life easier

For security managers and system administrators:

Extend control: with the CLM interface

Maintain security: because each administrator has their own login

Boost efficiency: by setting custom reminders for important tasks
For building users:

Enjoy greater convenience: when you update and revalidate keys remotely

Waste less time: with no need to return regularly to the management office

Experience peace of mind: because your data is private and protected

INTUITIVE SOFTWARE
A user-friendly interface puts you in control from any PC or laptop

IMPROVED SECURITY
Allocate access rights and collect audits from your desk or remotely

REMOTE UPDATE
Time-saving, convenient, remote access management without an internet connection

CLIQ Local Manager Remote

A leap forward for offline access management

New CLIQ Local Manager Remote functionality gives you even more choice and flexibility in how you manage access.

It offers the advantages of online access management without any need to replace your existing CLIQ system.

Remote functionality helps security managers do more — and control more — from their familiar CLIQ Local Manager interface.

Time-saving, convenient, remote access management without an internet connection

Save time and work more efficiently with Remote

CLIQ Local Manager Remote saves you time without the expense of installing new access management devices or connecting the system to the internet.

- Enable users to update keys remotely at up to 3 Wall Programmers

- Send jobs remotely from the CLM hub to the system via a controller

- Remotely change access authorization, set customized time, validity or schedules for all user keys

- Introduce key revalidation time to increase your system's security

- Retrieve audit trails remotely, so you can investigate any incidents fast

COMPONENTS OF A CLIQ LOCKING SYSTEM

CLIQ Local Manager to manage access rights for key holders, doors and time periods

Update keys remotely without need to visit admin

Programmable, battery-powered keys

Wide range of programmable cylinders and padlocks for different access points

Why choose intelligent key access management with CLIQ?

Cylinders and padlocks for **almost any opening**, inside or outdoors

Fast installation with one screw, no wires or drilling: Just swap cylinders

Easy key programming with new devices and user friendly software

Durable locking devices and keys with **battery life of up to 10 years**

Extend your system with new devices

Quickly **change how you use your spaces** by adding a CLIQ cylinder

Supplied by **trusted global company** with 140 years' experience

Abloy maintains Product Security Center at www.abloy.com/securitycenter. We recommend that you check the Center on a regular basis in order to be fully informed of product security updates, so that your knowledge of our products remains optimal.

It is the customer's responsibility to define the required level of security, whilst taking into consideration relevant factors for its operations. To achieve the overall level of security required in the customer's operations multiple layers of security must be in place. These include for example locking system, key management system, access management, CCTV and alarm system as well as physical security in a manner and level specified by the customer.
